## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Plasser (EP 429713 B1).

Plasser discloses a freight train for moving bulk material comprised of a plurality of loading vehicles 2. At the bottom of each vehicle is a conveyor belt 6 for moving bulk material from the rear to the front of the car. At the front of the car is a transfer belt 9 for moving the bulk material from a first car to an adjacent preceding car. A sensor 10 is mounted on the car and by using a laser can determine the height of the ballast in the hopper. Once the sensor determines that the ballast has in fact reached a maximum height the sensor will communicate with a central control unit 15 and stop the conveyor belts on the vehicles.

### ***Response to Arguments***

Applicant's arguments filed August 31, 2004 have been fully considered but they are not persuasive. Applicant argues that the prior art does not disclose the features in the instant claims. Specifically applicant states that claim 1 has been amended to include a control, which enables the speed of the bottom conveyor band to be controlled in response to the height h of the bulk material pile. The added feature to claim 1 only

Art Unit: 3617

mentions that a control is connected to the sensor device for actuating the drives for bottom and transfer conveyor bands. As stated above, and in the claims of page 6 of the prior art, the control unit 15 is connected to a sensor 10 and when the sensor is activated the control unit 15 switches off the conveyor belt drives arranged on the vehicle. This feature is fully described in claim 4 of the prior art on page 6.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Whitaker, Jr. (US 5,201,127) discloses a vehicle used to move bulk ballast material with a height sensor on the hopper section of the vehicle. Theurer et al (US 5,400,718) discloses a structure for a hopper car using multiple conveyor belts.
